## FULL-STACK DEVELOPER

*Future employers will benefit from my ability to learn quickly, create applications swiftly and with care, as well as deep dive into bugs to solve the problem at hand. I bring a desire to build projects that have a focus on clarity, usability, and utility.*

## TECHNICAL SKILLS

Ruby | Rails | JavaScript | React | Redux | Bootstrap | Semantic UI | PostgreSQL | Heroku | Adobe Suite

## TECHNICAL PROJECTS

**Map-Map** - Github | Visit Site | Blog Post | Video Demo
*A web application where users can create, collaborate, and share customized, geolocational maps*
- Built with React, Redux, Thunk, and Semantic UI for the frontend
- Full integration of Mapbox for geolocational data and presentation
- Ruby on Rails backend API using Google and Facebook OAuth with a PostgreSQL database

**Plane Game** - Github | Visit Site | Blog Post | Video Demo
*An in browser game which simulates the physics of throwing a paper plane at a target*
- Utilizes JavaScript for frontend interactions, fetch requests to the backend, and game engine
- Uses a Ruby on Rails API as the backend for game stats with a PostgreSQL database
- Responsive vanilla CSS for styling

**MeMix** - Github | Visit Site | Blog Post | Video Demo
*A social application giving users the ability to curate and share multimedia content via personalized mixes*
- Developed with Ruby on Rails to manage a complex MVC and a PostgreSQL database
- Integrates 4 apis (Spotify, OMDB, Google Books, the MET), and a custom web scraper (Poetry Foundation) to pull data for users to curate
- Makes use of OAuth, Nokogiri, Bcrypt, Httparty, and ActionText
- Uses Bootstrap and CSS for the frontend

**Recipe Freak** - Github | Visit Site | Blog Post | Video Demo
*A social application allowing users to create and share their recipes, and add ingredients to grocery lists*
- Built with Ruby, Sinatra, and a PostgreSQL database
- Demonstrates MVC fundamentals and uses Bcrypt for user authentication
- Uses vanilla CSS and JavaScript for the frontend

## EXPERIENCE

**NBC/Netflix/Viacom/AwesomenessTV**  Portland, OR
*Production Assistant*  08/2019 - 04/2020
- Kept the production organized and on track by distributing critical documents to crew and cast
- Maintained the office flow through performing important administrative tasks

**CedarNine Productions**  Portland, OR
*Assistant Video Editor*  06/2019 - 09/2019
- Used the newest video editing technology to assist the main video editor creating advertisements
- Recorded sound bites for client projects and assisted in essential tasks while on set

## EDUCATION

**Flatiron School**  Portland, OR
Full Stack Web Development, Ruby on Rails and JavaScript program  10/2020 - 03/2021

**University of Oregon**  Eugene, OR
Bachelor of Arts in Cinema Studies, 3.5 GPA  03/2019
